Sidney Freight Service Limited Incorporated For \$20,000

Recently the Sidney Freight Service has been incorporated as the Sidney Freight Service Limited, with a capital of \$20,000. The Sidney Freight Service has been carried on since May 22, 1919, by Roy Brethour and Herman Shade as a partnership and they have built up a large and prosperous business catering to business firms of Sidney and district. Brethour and Shade are known by practically everybody in not only Sidney and district but in Victoria as well. Mr. Brethour is a native son, his father, Henry Brethour, having arrived in the district in 1873. Mr. Brethour has witnessed a tremendous change during his life in this community.

For years, up till May 22, 1919, Mr. Brethour had been the station agent at Sidney on the Victoria and Sidney Railway and Mr. Shade was conductor on the run between here and Victoria. When the V. & S. ceased operations in May, 1919, Brethour and Shade immediately started a freight service between Sidney and Victoria.

Officials of the new Sidney Freight Service Limited are as follows:

President—Roy Brethour;
Secretary—Herman Shade;
Managing Director—J. G. Mitchell;
Director—J. C. Anderson.

The office of the Sidney Freight Service Limited will shortly be removed from Second Street to the office of Mitchell & Anderson Lumber Co. Ltd., where it will be more convenient for Mr. Mitchell as managing director.

Bank Of Montreal Crop Report

The Bank of Montreal has just issued the following crop report for the province of British Columbia:

"The Okanagan apple crop is reported better than last year; the fruit is sizing and ripening under favorable conditions, with the Duchess variety now moving. There is a good crop of pears and plums and some plum picking has commenced. The peach crop, which is very good, is sizing well and picking of a very good apricot crop is nearing the peak. Harvesting of a good crop of cherries is now completed. Potatoes are reported fair to good, tomatoes good, onions fair. The grain and hop crops continue good. A very good hay crop is being harvested, but pastures need rain. Grasshoppers are still doing considerable damage in some areas; other pests are normal. Irrigation water is considered ample, but rain would benefit some field crops."

ACTIVITIES AT THE HOSTESS HOUSE, SIDNEY

By A. H.

A special attraction was provided at last Friday's dance by the attendance of the "Toe Ticklers" Orchestra. The large and enthusiastic gathering repeatedly applauded the generous services of Mr. and Mrs. W. J. Wakefield and George L. Baal.

During the last week we have welcomed several new comers of the R.A.F. personnel as well as many of the Wireless Group and of 3 OTU.

Many of our volunteer hostesses are away on summer holidays. They have been doing fine work and we would like to take this opportunity to thank one and all for their co-operation and wish them pleasant holidays.

Our information bureau is still as busy as ever. The housing and rooms registry is one of our biggest problems. We urge householders to register any rooms they may have available. "This is a real war service." We thank the local I.O.D.E., the churches and clubs for their generous assistance. Any further help to cope with the housing problems of servicemen will be greatly appreciated. Kindly 'phone Sidney 230.

A parcel of socks was recently received from the R.A.F. Knitting Club in Victoria. All of these have been given out and thankfully received by the residents.

For the benefit of the many new arrivals who are stationed in the neighborhood, we would like to draw attention to the fact that the Sidney Hostess House extends the heartiest of welcomes to all of them. Games, amusements or happy quiet relaxation may be enjoyed every evening of the week. Our large bright rooms are always open from 10 a.m. to 11 p.m. each day, including Sunday.

We are always ready to help with any problems to the best of our ability.

Our baby clinic will reopen in the fall. The date will be published later.

We were sorry to say "Good bye" to many of the R.A.F. wives returning home. We wish them the best of luck. "Our prayers go with you!"

LETTER FROM MELBOURNE KEYWORTH

The following is a copy of a letter received by Rev. Thomas Keyworth from his son Melbourne written to his sister, Miss Helen Keyworth, who passed away in February last:

"My dearest Sister: I cannot express in words my sincere pleasure to be writing to you again. Glad to hear by your third letter that the holiday did you good and that your chest is improving. Your letters as always were masterpieces and so cheering. My health, glad to say, is tops. The climate here is similar to home and much more suitable than the previous camp. I sure would like some pictures of you and the family as I have none. As one letter is the limit give my love to all the family and friends. You are always in my thoughts and prayers. Your loving brother Mel."

FUEL

Have you made arrangements for your winter's supply of fuel?

If not, now is a good time to do so. We understand the amount of wood available is very limited and if you require coal you should put in your order now.

The subject of securing the winter's supply of fuel has been dwelt upon for months and many citizens have heeded the warning that it may be very difficult to secure fuel during the winter and have accordingly laid in a supply or have made arrangements to secure same.

Don't put it off indefinitely — you just invite a lot of grief by doing so. Plan now to have ample fuel for next winter and then you can relax and enjoy life!

While demands for telephone service have increased steadily during the war, the equipment necessary to provide service hasn't. The Telephone Company has been prevented from making any material additions to its system. That's why so many people have to do without telephone service these days. The foot just won't fit the shoe. Factories that used to produce telephone equipment are now needed to fill war orders. The telephone situation is likely to get worse before it gets better. In the meantime, essential needs for telephone service, particularly in connection with the war effort, must come first.

Many Firms and Organizations Are Co-operating to Conserve Electricity

The following excerpts, taken from letters recently received, tell how it is being done:

Lumber Industry:

"We will do everything we can to co-operate with you, although, as you know, it is rather difficult to cut down on the actual consumption in a sawmill, but wherever possible we will do so."

A Department Store:

"I am having an immediate check-up made throughout the store and can assure that everything possible will be done to save unnecessary consumption of electricity."

The Armed Forces:

"You may rest assured that the authorities will do everything in their power to help alleviate this situation."

And This:

"I beg to inform you that every effort is being made . . . to reduce consumption of electricity by all available means, and instructions to that effect (copy of which is enclosed) have this day been issued to all Departments for further co-operation."

Dairy Products:

"We are doing everything within our power to help keep our electrical consumption to bare necessities."

A Public Service Co.:

"We will be only too pleased to co-operate with you in every way possible in the saving of electricity."

Another Industrial Plant:

"We are issuing a memorandum to all our department heads and foremen, drawing their attention to the necessity of conserving, in their respective departments, the consumption of electricity. We are also posting notices in our two yards, urging all employees to exercise strict economy in their own homes."

The City and adjacent Municipalities have curtailed the use of electricity in certain services under their control and jurisdiction.

Many other letters and personal assurances of co-operation have been received. It is impossible for me to thank, personally, all who have pledged their help during the present power shortage. I would, therefore, ask all concerned to accept this as an acknowledgment of my thanks and appreciation. I hope conditions may soon improve, but until they do, continued conservation of Electricity is most essential.

Vice-President.

It Doesn't Leave a Lot for the Civilian

WHEN war demands have been filled . . . when invasion gasoline, aviation gasoline, Navy fuel oil, petroleum for the manufacture of explosives, synthetic rubber, and gasoline for war industry, farming and essential trucking all have been taken from Canada's oil supply — it doesn't leave a lot for the civilian!

Figure it out for yourself. It takes 5,250,000 gallons of gasoline to fuel 5,000 bombers and fighters for a mission over Germany. It takes enough oil for one fueling of a battleship to heat an average house for 350 years. It takes 18,000 gallons of gasoline to keep one armoured division on the move for one hour.

From petroleum and petroleum gases we obtain the gasoline and fuels needed to power planes and ships and tanks as well as the raw material for acetone, ammonia and toluol for explosives, organic chemicals for anaesthetics, naphthas for camouflage paints and plastics and resins for war weapons production.

This is why civilian gasoline is short. This is why it's up to every motorist, to every owner of an oil-heated home, to exercise the strictest economy in gasoline or fuel oil usage. Every gallon we can do without here at home is one gallon more for the fighting men. And they need every gallon they can get.

Two full years of gasoline rationing and fuel oil control in Canada have saved 393,000,000 gallons of gasoline and 175 million gallons of fuel oil — a total saving of 568,000,000 gallons of petroleum products. Yet, despite this saving, gasoline stocks on hand in Canada, as of March 31st, this year, were 55,000,000 gallons less than at the commencement of rationing, April 1, 1942.

Oil has a mighty war job to do — yet supplies are short and are constantly dwindling. Oil powers the attack on every front. Oil can mean the difference between success or failure, between light casualty lists and heavy. Oil is vital ammunition — not to be wasted, not to be needlessly, frivolously spent.

Answering Your Questions about the Gasoline Shortage

What are Canada's total yearly requirements of motor gasoline? . . . Approximately 800,000,000 gallons. Do these requirements have to cover both military and civilian needs? . . . Yes. Why cannot this supply be increased? . . . Because total hemispheric supplies are inadequate to meet both the colossal war demand and civilian needs. There is not enough oil, there are not enough tankers, for both. How much of Canada's petroleum needs is supplied from Canadian wells? . . . Only 15%. Why can't this home production be increased? . . . Every effort is being made to do so. More new wells are being drilled or prepared for drilling, than at any time in the history of Western Canada, but we have yet to find a new Turner Valley. War does not wait for new production.
